## Network Management Card

38200107

The Equip 38200107 is a web-based Network Management Card (NMC) for monitoring UPS via SNMP protocol.

I Key Features

■ Current support feature   □ nonsupport   ■ Support in the future

1、Network Protocol Supported;

Protocol	38200107
BOOTP/DHCP	■
HTTP	■
HTTPS	■
SNMPv1	■
SNMPv3	■
CLI	■
SSL	■
SSH	■
SMTP	■
NTP	■
(T)FTP	■
IPv6	■

2、Functions supplied:

A、SNMP

Function	38200107
SNMPv3	🟦
MIB support	RFC1628 MIB PPC MIB
TRAP	■

B、 Function with UPS

Function		38200107
UPS Monitor	UPS Status	Static chat
UPS Control	Remote Start/Turn off UPS	■
	Weekly Schedule	■
	Special Day Schedule	■
	Battery Test	■
	Battery Test Schedule	■
LOG	Log	UPS data log UPS event log NMC System event log
Environment	Temperature &Humidity	■

Parameters showed by the card:

Parameters	38200107
Input Voltage	■
Input Current	■
Input Frequence	■
Output Voltage	■
Output Current	■
Output Frequence	■
Rating Vlotage	■
Rating Current	■
Rating Power	■
Apparent Power	■
Active Power	■
Battery Voltage	■
Battery Voltage Per cell	■
Battery Cell Number	■
Battery capacity	■
Battery backup time	■
UPS Model Name	■
UPS Modules	🟦
Charger Modules	🟦

C、 Other function

Function	38200107
Email	4 receivers
Upgrade via network	■
Wake On Lan	■
RTC	IW apport Via network
Switch Hub Extend	☐
Language Support	Multiple languages
Connections Limitation	5 http,3 through SSL

3、Operating Systems supported by shutdown modules

OS	38200107
Windows	
Windows 2000	☐
Server 2003	■
Windows XP	■
Vista	■
Server 2008	■
Windows 7	■
Linux/UNIX/Mac OS	
Redhat	■
Fedora	■
Solaris	🟦
Novell SUSE	■
FreeBSD	🟦
IBM AIX	🟦
Mac OS	🟦
VMware ESX	🟦
Vmware ESXi	🟦
